<i>QAA subject benchmark statement(s):</i>	
<i>Mode/s of study:</i>	Postgraduate periods of study ¹ for full-time part-time two years part-time three years
<i>Language of study:</i>	English
<i>Paired with foundation year</i>	No
<i>Study abroad opportunities:</i>	No
<i>Placement year opportunity:</i>	No

Introduction and special features

The School of Health Sciences offers a suite of postgraduate programmes in the area of professional health and social care. The programmes are a response to both societal changes, including a greater focus on an aging population, more complex care needs, and changing patient expectations, and the Department of Health response to these changes as outlined in recent documentation (e.g., NHS Outcomes Framework 2014/15, Department of Health, 2013; Five year forward view, Department of Health, 2014; The Leadership Qualities Framework For Adult Social Care, Department of Health, 2012). The aims and content of each programme reflect priorities in the NHS and a broader focus on ill-health prevention, patient choice within care settings, and the potential for greater integrated care.

- MSc Promoting Health in Long-Term Conditions
- MSc Enabling Activity and Participation in Dementia
- MSc Leadership in Health and Social Care
- MSc Health and Wellbeing for Older People
- MSc Housing and Inclusive Environments
- MSc Quality and Safety in Health and Social Care
- MSc Professional Health and Social Care

The masters are designed for current or aspiring health and social care professionals. The MSc in Leadership in Health and Social Care includes two specialist modules that focus on the role of leadership in delivering innovation and promoting resilience in health and social care settings. It also includes three research-based modules that emphasise the development of skills that allow practitioners to critically appraise sources of evidence and apply it in order to bring about improvement within a health and social care setting. Study options are available as a Master's degree or Postgraduate Certificate for those who want to gain an understanding of subject matter but do not wish to conduct a full-scale research project or commit to a full masters award.

Admissions criteria

You must meet the University's general entry criteria for [postgraduate](#) study. In addition, you must have:

- A first or second class undergraduate honours degree in a health and/or social care related subject (with or without relevant experience working in health and/or social care).
- or
- A first or second class undergraduate honours degree in an unrelated area plus relevant experience working in health and/or social care.

If your first language is not English, you need to take an IELTS test or an equivalent qualification accepted by the University (see <https://www.yorksj.ac.uk/international/how-to-apply/english-language-requirements/>).

If you do not have traditional qualifications, you may be eligible for entry on the basis of [Accredited Prior \(Experiential\) Learning \(APL/APEL\)](#). We also consider applications for entry with advanced standing.

Programme aim(s)

The programme aims to provide education that meets the changing needs of health and social care professionals. This particular programme will enable graduates to demonstrate a critical awareness of a range of complex issues associated with leadership in health and social care and critically evaluate evidence in this area so to improve practice. These aims are achieved through demonstration of the Programme Learning Outcomes which are provided below and distinguish between the knowledge and understanding, research and intellectual skills, and professional development skills you will acquire as part of the programme.

Programme learning outcomes

Upon successful completion of the programme students will be able to:

Level 7

Students who gain the Postgraduate Certificate Innovation and Leadership in Health and Social Care or Postgraduate Certificate Resilience and Leadership in Health and Social Care will have demonstrated the following:

Knowledge and understanding:

- 7.1 A systematic understanding of knowledge related to leadership plus innovation or resilience in health and social care.
- 7.2 A critical awareness of current problems and/or new insights at the forefront of leadership plus innovation or resilience in health and social care.
- 7.3 Ability to synthesise, critique, and apply knowledge in the area of leaders to novel and complex problems in health and social care.

Research and intellectual skills:

- 7.4 Discerning application of evidence in planning positive change in a health and/or social care setting.
- 7.5 A critical understanding of established and novel methodological approaches and techniques of research in a health and/or social care setting.

Professional development skills:

- 7.6 Effective communication of complex ideas to a range of specialist and non-specialist audiences, specifically including clients, patients, and other professionals.
- 7.7 Self-direction and originality in tackling and solving problems, and the ability to act autonomously in planning and implementing tasks.
- 7.8 Initiative and critical reflection on professional and academic practice.

In addition, students who gain the Postgraduate Diploma Leadership in Health and Social Care will have demonstrated:

Research and intellectual skills to:

- 7.9 Ability to critically evaluate contemporary research and methodologies utilised in leadership in health and social care to create novel research questions.

In addition, students who gain the MSc Leadership in Health and Social Care will have demonstrated:

Research and intellectual skills to:

- 7.10 Ability to plan, conduct, report, and evaluate a sustained piece of original research in the area of leadership in health and social care.

Learning, teaching and assessment

In order to support achievement of the programme learning outcomes each module provides a range of approaches to teaching, learning and assessment. Teaching will take place in an inter-professional setting where you will have the opportunity to share and reflect on professional experiences. You will also take part in small group-based activities such as seminars, group discussions, tutorials, and workshops. Guided by the School's Technology-Enhanced Learning Framework, the VLE will also be used to provide a flexible means of using course materials independently and with support from staff. VLE activities include webinars, discussion forums, and quizzes. There will be a mix of direct timetabled hours at the University and contact through the VLE online platform. A range of supportive open learning tasks will allow you to gain feedback within each module and prepare you for assessed work. The assessments are dependent on the modules that are part of the programme and can include case studies, portfolios, essays, vivas, implementation plans, research proposals and an independent piece of research.

Progression and graduation requirements

The University's general [regulations](#) for postgraduate awards apply to this programme.

Any modules that must be passed for progression or award are indicated in the Programme Structure section as non-compensatable.
