Designed for productivity,
collaboration, and social progress.

York St John University London

Our London Campus is part of York St John University and has a commitment to educate, motivate and inspire a new generation of innovators, entrepreneurs and business leaders.

We are a community of pioneering and thought leading academics and supportive professional service staff, who all work together to offer an outstanding, creative and transformational environment for our students.

Set in the Export building at East India Dock, and part of the Republic Community, our campus is based in the richly diverse east part of London. Close to Canary Wharf, we are part of a vibrant, dynamic and innovative hub of creative, technology and start-up businesses. The unique cultural exchanges within our community create an empowering environment of collaboration and original thinking for all our stakeholders.

Louise Donaghy

Dean of London Campus | York St John University

Designed for Productivity, Collaboration, and Social Progress

The Dock at YSJ London is our dedicated start-up coworking space, designed for productivity, collaboration, and social progress.

We welcome both teams and solo entrepreneurs who are passionate about progress to join our community. Located in our newly built, state of the art London campus, The Dock provides a host of resources and events to build the skills, knowledge and networks that our members need to develop their business.

Members benefit from access to workspace and meeting rooms, as well as access to our MakerVerse, podcasting and content creation studio, and complimentary 1-1 professional coaching.

MakerVerse

The MakerVerse is one of the innovation spaces at York St John University London, where students can develop practical skills and hands-on experience using new technology and tools to bring ideas to life.

With access to 3D printers, poster printers, and virtual reality headsets, this unique environment fosters creativity, innovation and collaboration.

The MakerVerse offer a unique environment where you can experiment and create, using cutting-edge technology and tools to bring your ideas to life.

In addition to promoting innovation, the space can be used to help develop important skills such as problem-solving, critical thinking, and teamwork.
