

Mahara ePortfolio

Adding annotations

Introduction

A Mahara ePortfolio can be used to map evidence against a competency framework. The **SmartEvidence framework** may be attached to a template that can be copied or selected when creating an ePortfolio from scratch. An annotation block in Mahara ePortfolio allows a student to add notes against evidence to support a standard in a competency framework. This indicates to the assessor that standard is **ready for assessment** to give feedback via the competency framework map. The map shows pages across the top and standards down the left hand side.

	1: Applying Knowledge and Research	2: Communication
1		
1.1	0	•
1.2	0	•
1.3	0	•
1.4	0	•
1.5	0	•
1.6	0	•
2		
2.1	0	•

Add evidence

Go to the Mahara page you want to add evidence to and click on **edit**.

See **Mahara ePortfolio creating a basic page** for adding different types of media. Make sure you label the evidence in the **Block title** to reflect the standard number e.g. 1.1.1 Case Study

+ 1.1.1 Case Study

Add Annotation block

Click on **GENERAL** drop down menu on the left hand side, select **Annotation**, click **Add**. Enter information in the text box about the evidence contained on this page, select the **Standard** to which it applies from the drop-down menu.

Click **Save**.

Note, only one annotation block can be added to a page per standard number.

You can add multiple annotation blocks to a page to evidence a standard of your choice.

Add

Editing blocks

Click on the **cog** wheel to edit content in blocks.

Click on **Display Page** to view page.
