## Section 34 Scheme A – Marking scales and assessment conventions – applies to students entering in September 2020 onwards

### 34.1 Overview of the assessment scheme

#### Credits

- 34.1.1 Credits awarded or recognised by the University count only once for the purpose of progression and award. Work submitted for one module may not be submitted for another module.

#### Reassessment

- 34.1.2 Normally the maximum mark for the module available on re-examination is a capped mark of 40 for undergraduate/graduate level modules, and a capped mark of 50 for postgraduate level modules.

#### Compensating marks

- 34.1.3 A fail mark may be eligible to be compensated if a student enrolled on a programme leading to an award has attained a failure mark within the compensatable range.
- The compensatable range for undergraduate and graduate programmes is 35-39.
  - The compensatable range for postgraduate programmes is 45-49.
- 34.1.4 To be eligible for marks to be compensated the student must have a credit-weighted average for the level of at least 40 for Levels 3-6 and at least 50 for Level 7.
- 34.1.5 Modules stated as non-compensatable on the programme specification cannot be compensated and must be passed to remain on the programme.
- 34.1.6 Marks for modules that have been compensated count towards progression requirements and the final degree classification calculation.
- 34.1.7 There is a limit of:
- 20 credits that can be compensated at each level of an undergraduate or within a graduate programme
  - 30 credits that can be compensated within a postgraduate programme
- 34.1.8 Credit is awarded for the module if a module failure mark is compensated.
- 34.1.9 Compensation is automatically applied to an eligible mark identified at the progression point. Modules that are compensated do not need to be reassessed. However, students may if they wish to exercise their

normal right of resitting a module that has been automatically compensated, this would be for a maximum capped mark. If the compensated module is not reassessed and/or the mark is not improved the compensated mark will stand and be shown on the transcript with a grade PC 'Pass through compensation'.

- 34.1.10 Worked examples of using compensation can be found in **section 35.3** (undergraduate progression) and **section 39.4** (postgraduate award).

### Module failure

- 34.1.11 Failure in a module with a mark at first attempt lower than 35 (undergraduate/graduate) or 45 (postgraduate) cannot be compensated and **must** be reassessed to attempt to meet the progression or award requirements.
- 34.1.12 Only one reassessment attempt is available for each assessment.
- 34.1.13 The penalty for not attempting a resit in such a module, or for not raising the mark to meet the progression or award requirements following resit, may be termination of programme and a bar on progressing to the next level of the programme of study. Normally, where this arises students' studies are terminated at the Progress and Award Examination Panel. Following failure of a non-compensatable module students are not normally permitted to continue to complete other assessments in an attempt to achieve an exit award by accumulating more credit.

### Modules with assessment component qualifying marks

- 34.1.14 Some modules may require students to reach a specified standard in one or more assessment components within a module. This requires approval by the Quality and Standards Committee. The standard required is referred to as a **qualifying mark**. The qualifying mark required for each component is specified on the module specification. A module is deemed a fail if an assessment component qualifying mark is not achieved even if the overall module mark calculates above the pass mark.
- 34.1.15 A qualifying fail grade is given at first attempt where a student has achieved the mark of 40 or more for undergraduate/graduate level modules and 50 or more for postgraduate level modules but has not achieved the qualifying mark for one or more components.
- 34.1.16 If at reassessment the student achieves the qualifying mark required on the individual components, they had previously failed, the student will be awarded the overall module mark achieved in their first attempt. Where a student fails to achieve the necessary qualifying mark on one or more of the individual components the overall module mark will be capped at 39 for undergraduate/graduate level modules and 49 for postgraduate modules.
- 34.1.17 Undergraduate example:

#### First attempt

Assessment	Component % Weighting	Qualifying mark for component	Student's component marks at first attempt	Module mark calculation
Examination	30%	20	18	$18 \times 0.3 = 5.4$
Essay	70%	20	66	$66 \times 0.7 = 46.2$
<b>Final module mark</b>				<b>52 QF</b>

In this example there is a qualifying mark of 20 in each component. Although these component marks calculate to a mark of 50QF which is above the pass mark of 40 the student will need to resit the examination as the mark for the examination component is 18 and therefore the student has not met the qualifying mark requirement of a mark of 20 in each component.

#### Reassessment attempt scenarios

Student's action	Effect on raw module mark	Effect on final module mark
Student resits and passes the examination with a mark of 45	The raw module reassessment mark would calculate to 60	The student is not able to improve their mark through reassessment but has successfully met the qualifying mark requirements so can now be awarded the original mark before reassessment i.e. 52. The module mark would become a <b>capped pass at 52P</b> (rather than a reassessment capped at 40).

Student resits and fails the examination with a mark of 25	The raw module reassessment mark would calculate to 54	The student is not able to improve their mark through reassessment but has successfully met the qualifying mark requirements, even though the examination component mark is still a fail so can now be awarded the original mark before reassessment i.e. 52. The module mark would become a <b>capped pass at 52P</b> (rather than a reassessment capped at 40).
Student resits and fails the examination with a mark of 19	The raw module reassessment would calculate to 52	As the student has not met the qualifying mark requirement to raise the examination mark of 18 to 20 or greater, then the student has failed the module overall. The module mark would become a <b>fail capped at 39F</b>
Student does not resit the examination and a mark of zero is given for the non-attendance	The raw module reassessment mark would remain 52 based on the first attempt mark	As the student has not met the qualifying mark requirement to raise the examination mark of 18 to 20 or greater, then the student has failed the module overall. The module mark would become a <b>fail capped at 39F</b>

## 34.2 Marking schemes

- 34.2.1 Each module must carry one numerical mark **rounded to the nearest whole integer** on the University mark scale, unless the module is designated as pass/fail.
- 34.2.2 Some modules may be marked on a pass/fail basis following approval by the Quality and Standards Committee; this would be indicated on the module specification. Approval of such modules is only granted where there is a compelling rationale for the approach (e.g. competency-based modules in professional/vocational subjects). Such modules do not contribute marks to the calculation of the student's final degree classification, and failure in these modules cannot be compensated. All grade only credit bearing modules must be passed to obtain the credit required for progression and award.
- 34.2.3 Where a module is made up of several components the weighting for individual components are specified on the module specification. Pass/fail components do not contribute to the overall module mark but if not passed would result in the overall module mark and grade being recorded as a failure. After failure at reassessment the maximum mark available would be 39F (undergraduate) and 49F (postgraduate).
- 34.2.4 The University marking scale use a 0-100 judgemental scale.
- 34.2.5 Credit will be awarded upon receiving a pass mark and/or grade for the module, or where a failure mark is compensated provided the failure is not a qualifying failure i.e. with a QF grade at first attempt.

### Undergraduate and graduate Levels 4 to 6 and foundation Level 3

- 34.2.6 The mark scale for Levels 3 to 6 is set out in the table below:

Mark range	Honours Degree (indicative class)	Non-Honours (indicative result)
70-100	Class I	Pass with distinction
60-69	Class II Division i	Pass with merit
50-59	Class II Division ii	Pass
40-49	Class III	Pass
0-39*	Fail	Fail
<b>Pass mark</b>	<b>40</b>	<b>40</b>

\* A fail mark of 35-39 is potentially eligible to be compensated (refer to **section 34.1**)

- 34.2.7 The maximum mark available for the module on successful re-examination is 40 for the final module mark (i.e. a capped pass), except for modules with qualifying marks (refer to **section 34.1**).

## Integrated Master's Level 7

34.2.8 The mark scale for Level 7 modules that form part of an Integrated Master's degree is set out in the table below:

Mark range	Honours Degree (indicative result)
70-100	Class I
60-69	Class II Division i
50-59	Class II Division ii
0-49*	Fail
<b>Pass mark</b>	<b>50</b>

\* Note in Level 7 a fail mark of 45-49 is potentially eligible to be compensated (refer to [section 34.1](#))

34.2.9 The maximum mark available for the module on successful re-examination is 50 for the final module mark (i.e. a capped pass), except for modules with qualifying marks (refer to [section 34.1](#)).

## Taught postgraduate Level 7 and doctorate Level 8

34.2.10 The mark scale for postgraduate Level 7 and 8 modules is set out in the table below:

Mark range	Taught postgraduate (indicative result)
70-100	Pass with distinction
60-69	Pass with merit
50-59	Pass
0-49*	Fail
<b>Pass mark</b>	<b>50</b>

\* A fail mark of 45-49 is potentially eligible to be compensated (refer to [section 34.1](#))

34.2.11 In the case of Postgraduate Certificate or Diploma programmes from which transfer to a Master's programme is possible, a student is expected to achieve an overall Master's pass mark in a specified number of modules before recommendation for a transfer may be made.

34.2.12 The maximum mark available for the module on successful re-examination is 50 for the final module mark (i.e. a capped pass), except for modules with qualifying marks (refer to [section 34.1](#)).
