Introduction and Special Features

This programme is designed as an academic programme of study, structured to provide you with a range of academic and critical thinking skills applicable to the study of accounting and business management. As such the programme will give you a foundation for future study with professional bodies particularly ACCA (the Association of Chartered Certified Accountants) on a module by module basis.

This programme provides you with the opportunity to understand, analyse and interpret financial and business management decision-making in an organisational context. The programme combines a comprehensive grounding in key aspects of accounting and business management and consists of a range of modules which aim to give you a broad understanding of these areas. The programme integrates ICT, academic and research skills, culminating in the production of an independent study in semester 2 at Level 6. This provides the opportunity for you to integrate your academic skills in live practice.

The programme not only has a focus on the conceptual aspects of accounting but also applied features of accounting and business management. This will therefore equip you with the knowledge, understanding, key and specific skills and technical abilities required to make you employable in graduate positions in accounting and business management and a wide range of other employments. In particular the development of skills in problem-solving and analytical ability using a range of financial and accounting methods and concepts will positively differentiate you from graduates of business and management courses.

If you are studying on the BA(Hons) Accounting and Business Management with placement variant you will undertake a Year in Industry (also known as a sandwich year or placement year), in between your second and third year.

Special features

- Up to seven exemptions with the Association of Chartered Certified Accountants
- Up to four exemptions with the Chartered Institute of Management Accountants
- Accreditation with the Chartered Management Institute giving you a professionally recognised qualification alongside your degree (CMI Level 5 Certificate in Management and Leadership)
- A 'Year in Industry' (sandwich year) for those on the with placement variant
- Opportunity to study abroad
- Opportunity to qualify as a Microsoft Office Specialist
- Opportunity to engage in a piece of scholarly research that is individually supervised
- Taught by a small yet highly qualified team. You will be allocated an academic tutor to support you throughout the programme.
- Access to a range of specialist resources including, Financial Information Database (FAME) and Financial Times Interactive and business simulation software to support learning and research.
- Systematic development of employability skills through a Continuing Professional Development framework
- Throughout the course there is regular opportunity to engage with a range of practising accountants, managers, organisations, employers and entrepreneurs and take part in work-related experiences and internships
- Programme of guest speakers which will enhance your learning and links with the business community
- Opportunity to compete in business simulation competitions both within the University and on national / international scales

Admissions Criteria

You must meet the University's general entry criteria for [undergraduate](#) study.

If your first language is not English, you need to take an IELTS test or an equivalent qualification accepted by the University (see <https://www.yorks.ac.uk/international/how-to-apply/english-language-requirements/>).

If you do not have traditional qualifications, you may be eligible for entry on the basis of [Accredited Prior \(Experiential\) Learning \(APL/APEL\)](#).

We also consider applications for entry with advanced standing.

Programme Aims

The BA (Hons) Accounting and Business Management Programme is based on the philosophy that development should be incremental.

The programme encourages you to develop the skills and competences of a future professional. To do this, you should be capable of making accounting decisions at both a strategic and at a tactical level, emphasising the complexity and dynamics of accounting and management and taking cognisance of the integrative nature of the various factors which impinge upon business decisions. The programme incorporates frameworks for reviewing, reflecting, analysing and critiquing existing individual and organisational practices linked with accounting and management.

The outcome of this process will be a critical appreciation of accounting and management, in order to: make justified decisions; apply those decisions in a variety of contexts; communicating the decisions and make integrative links between disciplines and across organisations in a context of change.

The aims of the programmes are to:

1. equip you with an understanding of the integral role of accountancy and business management in organisations and society;
2. enable you to develop the skills and resilience needed for an accounting or business management, career in a rapidly changing business and social environment;
3. provide a vocationally relevant degree with professional accreditation;
4. facilitate the development and demonstration of your intellectual skills namely information-processing, analysis, synthesis, critical appraisal, creativity and innovation, and the ability to manage and make accounting and business management decisions in situations of ambiguity and uncertainty, within the context of the guiding principles of the Principles of Responsible Management Education (PRME);
5. provide you with the opportunity to engage in a suitable and independent piece of scholarly research that further develops their higher order cognitive and employability skills;
6. enable you to be a graduate who is able to function ethically and be capable of enhancing the quality accountancy and business management processes and decision-making across a range of organisations.

Programme Learning Outcomes

Level Four

On successful completion of the level four you will be able to:

Knowledge and Understanding

1. Describe and explain a range of relevant concepts, theories and models to the solution of accounting and business management problems.
2. Describe and identify accounting and business management decisions in a variety of organisational contexts.

Cognitive and Thinking Skills

3. Demonstrate the ability to apply a range of academic and intellectual skills relevant to Level Four study including, information gathering, analysis and problem identification.

Practical/Professional Skills

4. Exhibit the development of skills in relation to communication, organisation and working with others from organisational and national cultures and backgrounds.

5. Demonstrate the use of research skills to gather information.

Key Transferable Skills

6. Develop your own learning with guided support to explore a wide variety of learning sources and opportunities.

Level Five

On successful completion of level five you will be able to:

Knowledge and Understanding

1. Compare and contrast a range of relevant concepts, theories and models to the solution of accounting and business management problems.
2. Critically analyse and discuss tactical accounting and business management decisions in a variety of organisational contexts.

Cognitive and Thinking Skills

3. Demonstrate the ability to apply a range of academic and intellectual skills relevant to Level Five study including, information-gathering, problem-solving, analysis, and evaluation.

Practical/Professional Skills

4. Exhibit the development and achievement of skills in relation to communication, organisation and working with others from organisational and national cultures and backgrounds.
5. Demonstrate the use of research and enquiry to further their understanding.

Key Transferable Skills

6. Develop independence and your own learning to explore a wide variety of learning sources and opportunities.

Level Six

On successful completion of level six you will be able to:

Knowledge and Understanding

1. Apply a range of relevant concepts, theories and models to the solution of accounting and business management problems.
2. Synthesise and evaluate strategic and tactical accounting and business management decisions in a variety of organisational contexts.
3. Critically evaluate management thinking through an extended piece of research.

Cognitive and Thinking Skills

4. Demonstrate the ability to apply a range of academic and intellectual skills relevant to undergraduate level study including, information-gathering, problem-solving (incorporating creativity and innovation) and the skill to critically analyse, synthesise, and evaluate information and data to aid management decision-making.

Practical/Professional Skills

5. Exhibit the development and achievement of skills in relation to communication, organisation and working with others from organisational and national cultures and backgrounds in a professional manner.

6. Conduct research and enquiry to further your understanding and to inform management decision-making.
7. Demonstrate the use of management skills (e.g. delegation, negotiation and leadership).

Key Transferable Skills

8. Manage your own learning to explore a wide variety of learning sources and opportunities.

Programme Structure

At level four, the six compulsory modules are designed to give you a grounding in the key theoretical areas of accounting and business management.

At level six, you study a minimum of three compulsory modules directly related to your award. Alongside this you undertake 40 credits worth of research. You will complete a total of either five modules if you choose to undertake the 40 credit dissertation, or six modules if you choose to undertake one of the alternative research routes which consist of two 20 credit research modules (as opposed to the 40 credit dissertation).

Modules for the Programme

Code	Level	Semester	Title	Credits	Status of Module*
1BMB08	4	1	Organisational Behaviour in the Digital Age	20	C

Option 5					
3BMA04	6	1	Advanced Auditing	20	O
3BMA05	6	2	Advanced Taxation	20	O

***C**: compulsory, **CA**: compulsory for award, **O**: option

Note that to study abroad you must meet the university's standard study abroad requirements.

Continuing Professional Development

You are strongly encouraged to undertake Continuing Professional Development throughout your studies to prepare you for the world of work. You will be able to develop a range of academic and professional skills through a range of activities, exercises and events (which includes undertaking a 20 day work related activity) which will help you to progress through the course and into the job market, and provide the work based skills employers require.

Study Abroad

You have the opportunity (subject to meeting the University Threshold Standards) to undertake a semester or full year abroad¹ as part of your studies during your second year.

Teaching, Learning and Assessment

All modules are delivered utilising a range of teaching, learning and assessment strategies including lectures, seminars, guest speakers, tutorials, workshops and a range of events and learning activities.

You are supported initially in the use of guided learning strategies in Level 4 developing towards autonomous, well-judged use of collaborative and independent learning strategies in Levels 5 and 6.

Throughout the programme you will be introduced to a range of different teaching and learning strategies. For example, in Level 4 you will be introduced to the foundations of core accounting concepts through Introduction to Financial Accounting and interrelationships of business function (Ventures in Entrepreneurship). At Level 5 (for example) there will be evidence of practice based learning (Financial Planning and Control) in which you will be expected to engage in practical based activities. Finally, at Level 6 (for example) you will demonstrate your skills through practice and enquiry based learning giving you the opportunity to develop creative and innovative solutions to problems through Advanced Financial Reporting and Corporate Governance.

You will undertake a variety of assessments which include the use of written assignments (often in the form of reports), individual and group presentations, exams and tests, and practical activities. An essential part of the assessment is to encourage both learning and the development of skills as well as preparing you for the requirements of the workplace.

You will have opportunities for formative assessment and feedback to inform your work prior to submission and you will receive detailed feedback on assessments to help you develop and continuously improve your performance whilst on the programme. Advice will be provided in

¹ If you are taking the placement award you are only eligible for one semester abroad.

relation to development, further areas for research and guidance on how to enhance your knowledge of business and practice.

You will have the opportunity for study support including academic writing and research skills to enhance employability and career development in the field accounting and business management.

Progression and Graduation Requirements

The University's [general regulations for undergraduate awards](#) apply to this programme.

Any modules that must be passed for progression or award are indicated in the Programme Structure section.

Students who achieve the standard requirements for an honours degree who do not achieve the compulsory for award modules will be awarded the degree of BA (Hons) Business Administration.

Internal and External Reference Points
