<i>Language of study:</i>	English
<i>Paired with foundation year</i>	Yes
<i>Study abroad opportunities:</i>	Yes
<i>Placement year opportunity:</i>	Yes

Introduction and special features

BA (Hons) Sociology with Criminology at YSJU is a three-year programme structured to develop our students into critical thinkers. It is ideal for you if you are interested in the social world, and how this is impacted by crime. We never forget that your life after YSJU will be much longer and less predictable than your life at YSJU and the structure of the programme is designed to provide you with supportive opportunities to develop the sorts of skills that are required in graduate jobs. These will include presentational and communicative skills as well as criticality and problem-solving.

We want you to do well and to secure employment. To help, we will provide you with the pastoral support to develop as individuals as well as the academic instruction, tutelage, and research opportunities that will make you confident scholars in the study and practice of sociology and criminology. You will also be provided with opportunities to engage with employers through our jobs and volunteering fairs. This will help you to get an insight into both job roles and employer requirements.

In this way the practical benefits of undertaking a degree in Sociology with Criminology can be seen in the development of general and specific skills, which are transferable to the working world. Sociology considers the diversity and complexity of societies through research at a macro level (institutions, governments, nations) and at a micro level (everyday social interactions, work, leisure, social media, consumption). Criminology contributes to this by considering the ways in which crime challenges society. Sociology with Criminology helps to develop critically engaged individuals who understand a variety of social,

¹ The standard period of study will apply unless otherwise stated

criminological and political challenges; it does so by using research-led teaching to foster socially responsible citizens who are able to have a meaningful impact upon the world within which they live.

The practical benefits of undertaking a degree in Sociology with Criminology include the development of both specific skills and those that are widely applicable, a beneficial combination transferable to the working world. These include the ability to research, collect and analyse data, use a range of software packages, conduct comparative and policy analysis, administer, organise, plan and manage research projects, write and edit at the academic level, present evidence and argument, and engage in critical debate. These skills not only make our students knowledgeable scholars of Sociology as well as Criminology, but also sought-after candidates in the job market. In a post-industrial society, where innovation and evolution are expectations, this programme will provide you with exactly the variety of skills required to enable you to cope with a future that demands critical thinking and research ability (in addition to real-world practical skills).

The distinctive and unique contribution of Social Scientists to the world is a critical and interpretive way of seeing that unpicks the structures, systems, partialities, and inequalities which influence how sectors, organisations and people behave. Our interpretation of Work-Related Experiential Learning, authentic to the subject, is to reframe this embedded critique using a lens of opportunity – gearing up York St John Social Scientists to not only see, but also affect and offer positive change to whatever structure (family, relationships, education, community) or organisation that they exist or work in or with. Embedded in our programme, this approach can be dissected into three main strands. 1) **Skill acquisition via taught content and assessment:** the nature of the assessments and taught content refocuses on problem solving of contemporary, relevant, problems, and of developing the skills to make social justice-oriented contributions predominantly in the third sector. 2) **Awareness and Articulation:** where modules highlight relevant career pathways associated with taught content and help you to communicate your skills and contribution to relevant employers. 3) **Partnership:** where exposure to and networking with industry stakeholders via classroom time and assessment, live briefs and real-world industry-led or designed problems allows you to practice authentic uses of your Social Sciences skills.

You will be changed by your experiences on BA (Hons) Sociology with Criminology and successful completion of the programme will lead to the development of new skills and the enhancement of existing skills.

Special features

- **Research specialisms**
Modules are relevant, engaging and informed by up-to-the-minute social and criminological research conducted by academics who teach across the programme, with a focus on the areas of deviant leisure, social inequalities, criminal justice, youth, technology, ethnicity, prisons and penology.
- **Tailored specialisms**
The third year of the programme (Level 6) gives you the opportunity to specialize and tailor your interests towards a variety of different areas across the whole Social Sciences portfolio
- **Support with employability**
Through structured academic supervision and Careers support across the degree programme, you will be equipped with the necessary skills and competencies to prepare you for life after undergraduate study

Admissions criteria

You must meet the University's general entry criteria for [undergraduate](#) study.

If your first language is not English, you need to take an IELTS test or an equivalent qualification accepted by the University (see <https://www.yorksj.ac.uk/international/how-to-apply/english-language-requirements/>).

If you do not have traditional qualifications, you may be eligible for entry on the basis of [Recognition of prior learning \(RPL\)](#). We also consider applications for entry with advanced standing.

Programme aim(s)

BA(Hons) Sociology with Criminology is the course that will provide you with opportunities to develop your skills, capabilities and critical thinking through the study of the social world and prepare you for work as critically oriented individuals who understand and can respond to a variety of social, cultural and criminological challenges.

The programme, in terms of both structure and content, offers a valuable springboard to those wishing to pursue graduate study and research.

Programme learning outcomes

Upon successful completion of the programme students will be able to:

Level 4

- 4.1 Demonstrate an awareness of differing sociological and criminological perspectives
- 4.2 Define key concepts in sociology and criminology explaining how they apply to social life
- 4.3 Locate and evaluate relevant academic literature
- 4.4 Construct convincing arguments and communicate information and ideas clearly
- 4.5 Demonstrate the ability to work both independently and collaboratively with fellow students
- 4.6 Demonstrate a range of digital skills as appropriate

Level 5

- 5.1 Apply sociological and criminological theories to a range of situations and issues
- 5.2 Analyse social processes shaping individuals, groups, social practices, social institutions and social structures
- 5.3 Identify the value of the disciplines of sociology and criminology to working environments
- 5.4 Demonstrate how qualitative research methods are used to generate evidence in an ethical manner
- 5.5 Demonstrate how quantitative research methods are used to generate evidence in an ethical manner
- 5.6 Discuss sociological and criminological topics with appreciation of theory, evidence and relevance to current debates and present the conclusions in a variety of appropriate sociological formats suitable for different audiences

Level 6

- 6.1 Critically analyse sociology and criminology as a distinct form of knowledge and practice
- 6.2 Work independently to plan and carry out research with appropriate supervision
- 6.3 Appraise and select sociological and criminological evidence to challenge assumptions and formulate alternatives
- 6.4 Critically evaluate evidence and competing explanations
- 6.5 Critically analyse evidence and communicate this clearly and effectively
- 6.6 Demonstrate the use of sociology and criminology within critical understanding of social issues

Programme structure

Code	Level	Semester	Title	Credits	Module status

SOC6007M	6	2	Death	20	O ¹	X

¹ At Level 6, Sociology with Criminology students are required to select four optional modules, including a minimum of two modules with an SOC code and one with a CRI code

Please note that all modules are subject to staffing and timetable availability, and sufficient student numbers each year.

Learning, teaching and assessment

As a student on BA (Hons) Sociology with Criminology you will experience a range of teaching styles and settings and a variety of approaches to support and direct your learning. Classes will generally involve tutor-led input interspersed with student activities. Activities may include small group work, discussions,

guided reading and library-based research leading to feedback. Modules with lectures will also benefit from the provision of seminars (small groups of students with a tutor) and tutorials (one-to-one meetings with a tutor). In addition, there is an emphasis on independent study outside of formal teaching sessions including directed reading tasks, student-based project work, engaging with the online virtual learning environment (VLE) and encouragement to attend guest lectures and research seminars.

The range of resources is designed to enable you to work collaboratively and build your knowledge beyond guided reading so that you are able to engage with key debates within the approaches to theory. Sociology and Criminology are rich and varied disciplines and, as such, you must be able and willing to explore the depth of knowledge and experience at your disposal. You will study a variety of challenging issues and cases.

Although it is important to learn about the disciplines of sociology and criminology, the development of academic skills is not overlooked and there will be various activities which are aimed at making you more effective in the work that you produce whilst on the course. As part of this, skills which are valued by employers, such as communication, presentational and organisational skills are intrinsic to assignments. You will find further support in relation to the development of academic skills on the programme's Moodle site.

York St. John University adopts the position that students are co-producers of knowledge rather than just recipients of it. We see students as an important aspect of a student-centred approach. As such there will be opportunities for students to engage in research in different ways such as through the Research Assistant scheme. This provides students with the opportunity to take part in research projects being carried out by staff if successful. York St John University aims to ensure that you have opportunities to engage in the study of Sociology and Criminology rather than just hear about how knowledge is produced.

Transferable skills and competencies as evident within graduate attributes will be achieved through the tiered learning progression. As such, Level 4 has increased contact time to ensure that you have a sound grounding in the subject area in key modules; this is gradually reduced at Level 5 and 6 in order to develop your autonomy, whilst still providing a supportive environment through regular tutorials. At Level 6, you will be expected to engage in critical enquiry-based learning to develop your individual autonomous reasoning, analytical and research skills to a high standard.

Throughout your studies you will have an opportunity to undertake modules that are related to the careers that you may wish to pursue in the future. At Level 5, you will study a specialist module that will allow you to reflect upon work and employability in the context of Criminology. In addition, Social Science careers events will feature guest speakers from related sectors to provide relevant insight. You will also be encouraged to undertake volunteering activities to enhance your future employability; this will be with organisations or agencies and voluntary groups that support a range of issues related to sociology and criminology.

You will be assigned an academic tutor in addition to module tutors. The role of the academic tutor is to provide additional support with your studies where necessary. Further to this support the university provides extensive support in a range of academic skills, such as writing assignments and the use of the library for locating relevant information.

York St. John University is committed to embedding formative assessment activities as part of its approach to teaching, learning and assessment: these are activities which develop your understanding of how assessed work is marked and how you might produce work to a higher standard. The intention is to ensure that you receive on-going feedback relating to your learning and development which will assist you in being successful in your studies. You will encounter a range of assessment approaches which are designed to enable you to develop a range of skills and meet the learning outcomes detailed earlier. Formative and summative assessment will be by a variety of methods appropriate to the specified Programme Learning Outcomes, the level, and the specific module.

Progression and graduation requirements

The University's [general regulations](#) for undergraduate awards apply to this programme.

Any modules that must be passed for progression or award are indicated in the Programme Structure section as non-compensatable.
