

What it is: SLIDER (PHILLIP BLOOM POCKET DOLLY)

Includes: N/A

What it does:

A compact alternative to a traditional track and dolly system. Enables the achievement of smooth tracking shots.

Further information:

Use with the Oracle Controller (booked separately), an electronic motor for the slider that allows the camera to be moved with pinpoint precision. Programmable to allow for start/stop points to be set. Great for time-lapse photography.

Available to Year 3 only.

Where to find it:

Booked and collected from the FTV support hub.
